DELO KATIOBOND 4552

modified epoxy resin 1C light-activated			
free of solvents unfilled preactivated			
 Special features of product compliant with RoHS Directive 2015/863/EU passes ANSI/UL 94 HB Flame Test 	ypical area of use • -40 - 150 °C		
Curing			
Suitable lamp types		LED 460 nm	ı, UVA
Processing			
Adhesive application		needle-dispensable	
Storage life in unopened original container			
at 0 °C to +25 °C		6	month(s)
Technical properties			
Color in cured condition in 0.1 mm layer thickness		yellow	
Transparency in cured condition in 0.1 mm layer thickne	SS	transparent	
Parameters

General curing and processing information

The curing time stated in the technical data was determined in the laboratory. It can vary depending on the adhesive quantity and component geometry and is therefore a reference value.

Increasing or decreasing the curing temperature and / or irradiation intensity and / or irradiation intensity

shortens or prolongs the curing time and can lead to changed physical properties. A short irradiation time (preactivation time) results in an open time within which opaque components can be joined.

The cationic curing mechanism enables the adhesive to cure on opaque components after joining by sufficient preactivation.

All curing or light fixation parameters depend on material thickness and absorption, adhesive layer thickness, lamp type and distance between lamp and adhesive layer.

Curing until final strength proceeds within 24 hours at room temperature.

High temperatures during or after curing can lead to post-crosslinking of the adhesive which influences the physical properties of the bond.

Values measured after 24 h at approx. 23 °C / 50 % r.h., unless otherwise specified.

General

The data and information provided are based on tests performed under laboratory conditions. Reliable information about the behavior of the product under practical conditions and its suitability for a specific purpose cannot be concluded from this. It is the customer's responsibility to test the suitability of a product for the intended purpose by considering all specific requirements and by applying standards the customer deems suitable (e. g. DIN 2304-1). Type, physical and chemical properties of the materials to be processed with the product, as well as all actual influences occurring during transport, storage, processing and use, may cause deviations in the behavior of the product compared to its behavior under laboratory conditions. All data provided are typical average values or uniquely determined parameters measured under laboratory conditions. The data and information provided are therefore no guarantee for specific product properties or the suitability of the product for a specific purpose. Nothing contained herein shall be construed to indicate the non-existence of any relevant patents or to

constitute a permission, encouragement or recommendation to practice any development covered by any patents, without permission of the owner of this patent.

All products provided by DELO are subject to DELO's General Terms of Business. Verbal ancillary agreements are deemed not to exist.

Instructions for use

Specification

Nothing contained in this Technical Datasheet shall be interpreted as any express warranty or guarantee. This Technical Datasheet is for reference only and does not constitute a product specification. Please ask our responsible Sales Engineer for the applicable product specification which includes defined ranges. DELO is neither liable for any values and content of this Technical Datasheet nor for oral or written recommendations regarding the use, unless otherwise agreed in writing. This limitation of liability is not applicable for damages resulting from intent, gross negligence or culpable breach of cardinal obligations, nor shall it apply in case of death or personal injury or in case of liability under any applicable compulsory law.
